Course Objectives

1. Number and Operation - Students will solve problems and reason with number concepts using multiple representations, make connections within math and across disciplines, and communicate their ideas.
2. Algebra - Students will solve problems and reason with algebra using multiple representations, make connections within math and across disciplines, and communicate their ideas.
3. Geometry and Measurement - Students will solve problems and reason with geometry using multiple representations, make connections within math and across disciplines, and communicate their ideas.
4. Data Analysis and Probability- Students will solve problems and reason with data/probability using multiple representations, make connections within math and across disciplines, and communicate their ideas.

Required Materials

- Writing Utensil (Pencil)
- iPad
- Calculator - There are calculators available but cannot leave the room.

Expectations:

- Your lanyard must be worn at all times.
- Be on time for class each day. You should be ready to learn before the bell rings.
- Cell phone use is not allowed in class. Earbuds/headphones may be used when required for class only.
- Work hard each day in class and know that everything we do in class has purpose. Growth in math is important.

Grading:

A+	98-100
A	93-97
B+	90-92
B	85-89
C+	82-84
C	77-81
D+	74-76
D	70-73
F	Below 70
